SIGPLAN-M Mentee Registration Form

The long-term mentoring program is for anybody who is interested in or in the process of pursuing a career in programming languages research in either academia or industry. We want mentees to form lasting connections, and to have access to outside perspectives early in their career. You will be assigned a mentor, whom can be a faculty, industrial researchers, senior graduate students, and so on. Do not be shy about the information you provide. We will use it to find a good match for you!

This form is meant for the organizers to get an idea of whom you can be matched with. You will be assigned on a year-long mentorship, and as such we want to make the experience for both parties as pleasant as possible. We try to assign mentors that share common interests with mentees (for example, a technical topic), that have expertise that mentees are looking for (like being an industrial researcher or being an international student), or that can help mentees achieve their goals (like applying to graduate school).

If you have questions that you would like to ask, please contact Nadia Polikarpova (npolikarpova@eng.ucsd.edu).

What do you want to get from the mentoring? (1 sentence) *

Your answer

What are your technical interests, briefly? *

Your answer

How important is it that we match your technical interests? *

We often have a mentor available who will share either your technical interests, or your non-technical interests, but not both. This question helps us make effective matches when situations like these arise.

	1	2	3	4	5	
Interests may be different	○	○	◉	○	○	Interests match mine exactly

Select any technical interests that apply to you. (Please check "unsure / new to PL" if you don't know what these topics are about, which is perfectly OK.) *

- [x] Compilers
- [x] Metaprogramming
- [ ] Type Systems
- [ ] Program Analysis
- [ ] Program Synthesis
- [ ] Domain-Specific Languages
- [x] SMT Solvers
- [ ] Model Checking
- [ ] Type Theory / Dependent Types
- [ ] Probabilistic Programming
- [ ] Logic Programming
- [ ] Category Theory / Logic
- [ ] Static Analysis
- [ ] Dynamic Analysis
- [ ] Abstract Interpretation
- [ ] Quantum Programming (PL + Quantum)
- [ ] Functional Programming
- [ ] Lexing / Parsing
- [ ] Theorem Proving / Verification / Proof Assistants
- [ ] Secure Programming (PL + Security)
- [ ] Concurrency
- [ ] PL + HCI
- [ ] PL + Machine Learning
- [ ] Unsure / new to PL
- [ ] Other:

What non-technical topics would you like to discuss with your mentor, if any? *

Examples include mental health, relationships with advisors, industry jobs, academic jobs, family planning, being from an underrepresented group in PL, succeeding in a Ph.D. program, applying for Ph.D. programs, being an international student, writing, reading papers, and so on. List as many as you can think of---it makes it easier for us to match you with a good mentor.

Your answer

How important is it that we match your non-technical interests? *

We often have a mentor available who will share either your technical interests, or your non-technical interests, but not both. This question helps us make effective matches when situations like these arise.

	1	2	3	4	5	
Interests may be different	○	○	○	◉	○	Interests match mine exactly

What is your current affiliation and job title? *

Your answer

What country do you live in? *

Your answer

Have you lived in any other countries? If so, where? *

- ○ No
- ◉ Other:

This is a required question

Are you faculty? *

- ○ Yes
- ◉ No
- ○ Doesn't matter

Is there anything we should keep in mind in assigning you a match?

Your answer

Is there anyone we should avoid matching you with? If so, you may list them.
